

## Testimonials

"I wish doctors were told years ago of the importance of touch screen and digital technology utilization in the office. It has created what I can best describe as a freedom that I have never experienced before. Of this technology, I chose ChiroTouch because I found that it was the easiest to use from the systems that I investigated. Another item of huge importance to me is the impeccable service that is impressive with ChiroTouch. When I call, I get through to a live person who has been able to answer my questions. That goes a long way with me."

*Alfonso DiCarlo, D.C./Allentown, PA*

"As a recent graduate with aspirations of opening an evidence-based chiropractic center, I knew that I needed software that was highly customizable. ChiroTouch allowed me the freedom to create a macros set (that I now share with other CT users) that is current, evidence-based, and detailed. In less than 1 year's time I have managed to build my practice around primary care medical referrals. I lecture at Grand Rounds for my local hospital in an attempt to bridge the gap between MD's and DC's and now have several local medical doctors referring patients to me on a weekly basis. They all tell me that they love my patient summary letters that I send to them updating the patient's progress. ChiroTouch creates these letters for me with fully customized information specific to each patient! ChiroTouch also writes my initial letters for Worker's Compensation approvals, cover letters to attorneys, initial reports for WC and PI, schedules my patients, batches my claims, manages my financial reports, records my patients' subjective notes, and much, much more. ChiroTouch is so customizable that I have even recommended it to some of my friends that are N.D's and M.D's for their offices. Whether you are a "straight", "mixer", "evidence-based", or "faith-based" you can make ChiroTouch work for you." It was my second best investment when opening my practice...after my treatment table."

*Todd Mexico, D.C./Baldwinville, MA*

"What a great program ChiroTouch has been for us. The service has always been outstanding as well. Since implementing ChiroTouch, my life and my staff's life have improved greatly. No more hunting for files, EOBs, or care plans. It's all right there. My note taking time has been reduced and the quality is far better. If I had to purchase another system it would be ChiroTouch; the price, the service, and the product can't be matched. Thank you for making my life and practice better."

Yours in Health,  
*Josh Shields, D.C./Newman, GA*

## Testimonials

"ChiroTouch is easy to use, has all the features that I want and the software support is excellent! We have never even had a software glitch. Much better and easier to use than the previous software I was using!"

Thanks for a great product,  
*Paul Brugger, D.C./Burlington, NC*

"I was very pleased to find that ChiroTouch was extremely easy to implement into my office. My staff and I found it to be incredibly user friendly, keeping the learning curve down to a minimum. We have found that the applications in ChiroTouch are very practical for efficiently running our office."

*Kandace Johnson, D.C./Victoria, MN*

"I am the office manager in a busy chiropractic office, and have worked with many systems for over 20 years. ChiroTouch is by far the most user friendly system of any that I have used. The navigation between screens is very simple and fast. The scheduler that is included with ChiroTouch makes scheduling and rescheduling simple and clear, with only a few touches on the screen. I love working with this system, and it makes my job much easier."

*Tammy, Office Manager from the office of Ed Corley, D.C./University Place, WA*

"I have been an associate doctor for 4 1/2 years, and just opened my first practice. I had been searching for a system that efficiently and easily combined everything I would need in my own practice, and felt that my search was over when I found ChiroTouch. For the 2 1/2 months that I have been using it, I have found it to be extraordinarily easy to use. The ability to import films digitally into the patient's file makes it easy to show the patient their films, without having to take the time to find the x-rays and put them up on the light box. The ability to view treatment notes, charges, diagnoses, x-rays, reports, and scans on my computer prior to seeing the patient has increased my efficiency as a doctor, along with minimizing the time spent to look up all of this information in various places. The transition to this system was very easy, and I called my prior associate and highly recommended that he switch over to the ChiroTouch system."

*John Colarusso, D.C./Riverton, UT*

## Testimonials

---

"The dashboard is stunning! I love having all of the patient records at my fingertips. The charting of patient notes is so interactive while with the patient, that charting feels no different than having a conversation with my patient. I notice that updates are focused on increasing the flow and ease of seeing patients, as opposed to only focusing on statistical practice analysis."

*David Day, D.C./Portland, Oregon*

"I have used ChiroTouch for the last 6 months and what I love most about it, is its continual updates, advancements, flexibility in usages, and its unlimited potential to fit my practice's needs."

*Eugene Su, D.C./Ashburn, VA*

"I love the ChiroTouch software. I have eliminated my filing cabinet, files, and almost all paperwork. The patient's x-rays, scans, exam findings are right there at your fingertips when adjusting the patient. I cannot say enough about how awesome this software is."

*Jim Shearman, D.C./Omaha, NE*

"The patient information is much easier to keep track of using ChiroTouch, with the ability to process more patients per day. We are a new office, and the learning curve with ChiroTouch was very small, being a simple program to learn and use. I love the digital notes, and how fast and easy it is to produce long, detailed notes."

*Bryan Berger, D.C./Jamesburg, NJ*

"The provider screen is great! Changing notes is incredibly fast and easy with the macro one-touch system, and I can customize the macros to my personal liking. Using this system has saved both me and my staff valuable time that can be used in other efficient ways."

*John Davis, D.C./Monroe, LA*

## Testimonials

"We were using three different software companies for our scheduling, billing, and note taking. ChiroTouch has brought us into the 21st century by combining the three into one easy to use chiropractic software system. Our original concerns when researching software was being able to keep up with the same patient load, ease of use, cost of software and support, and ability to change with the future. ChiroTouch allows for the doctor to generate a thorough note in a short amount of time, the support is half the amount we paid previously, and they continually update the software system making improvements based off the customers suggestions. Thank you, Dr. Failla and the ChiroTouch team."

*David Haas, D.C./Mason City, IA*

"I have been managing a chiropractic office for a few months, and was very pleased when I started there to see that they had recently incorporated ChiroTouch as their practice management system. The office where I previously worked also used ChiroTouch, and was very satisfied with the system. I am most pleased with how easy it is to understand. The learning curve was very low, as it's extremely user-friendly. The staff spends much less time processing patient information than before, and are able to spend that extra time seeing more patients, and being more efficient following up with patients. I understand that the transition to ChiroTouch was relatively simple, and the doctors love the simplicity and comprehensiveness of the notes. Overall, the office is saving money every month that we use ChiroTouch, compared to our previous system."

*Cheryl, Office Manager for David Slossberg, D.C./Lake Worth, FL*

"ChiroTouch has taken a lot of unnecessary work off me. This is a very busy office with just me and the doctor. This program has freed me up to be doing other things and helping the patients - not just standing behind the desk. I have searched for this program for 2 years. I have found only a few programs out there, but none as good or priced right like ChiroTouch."

*Marlo R., Office Manager for Jody Matthews, D.C./Villa Rica, GA*

## Testimonials

"ChiroTouch has made information management much easier. With many outside agencies requiring and requesting thorough documentation, having the ability to access any patient from any computer at any time, and ensuring easy assignment of diagnoses, fees and scheduling is a huge highlight for my office.

My billing manager moved from Lytec 2006 version (like MediSoft) to ChiroTouch in early 2006. She says, 'ChiroTouch is very easy to move through patient accounts, and being able to simply read and understand the billing screens is awesome!'"

*Curtis Damien, D.C./Millington, TN*

January 9, 2008

Dear ChiroTouch Team:

"I would like to take the opportunity to give you a HUGE Thank You!!!

As many of you know from speaking with me, I opened my first solo practice earlier last year. During the planning phase, one of the biggest concerns I had was the practice management software. What was going to be the infrastructure of my flagship office? At that time, I met Dr. Speakman and Ron McNeill at the Parker Las Vegas Seminar who were representing ChiroTouch. I was impressed...to say the least.

After looking at several packages, we decided that ChiroTouch was the way to go!

Now...8 months after opening my doors, I am seeing an average of 70-80 patient visits per week AND IT COULDN'T BE EASIER!!! I'm saving a ton of money on paper, my weekly billing takes 3 minutes, and I'm never looking for notes or patient information...because it is always right there for me.

I'd also like to thank Michelle, Kim, Rick, and the rest of the support staff for being so great. If I ever have a problem or question, they are always there to answer or fix it. The way they log in to my whole system and just "take care of it" is great. The minor and major updates have been amazing for the program...and they were implemented flawlessly during my lunch breaks, so they didn't interfere with patient hours.

I tell everyone I can about your program and how great it is. If anyone is thinking about making the switch to a completely paperless system that is designed for our profession.....CHIROTOUCH IS THE ANSWER!!!"

Thank you for Everything,  
*Robert W. Kipp, D.C./Fairfield, CT*
